Dashboard from challenge:

Original example used: 01-hello

1. Dark mode: Change background to black, text to white

```
ui <- fluidPage(  
  
  tags$head(  
    tags$style(HTML("  
      body {  
        background-color: black;  
        color: white;  
      }"  
    )  
  )  
  
)
```

2. Change the title

```
titlePanel("Waiting Times between Eruptions at Old Faithful Geyser")
```

3. Edit text colours, add additional text, and add line breaks

```

sliderInput(inputId = "bins",
            label = tags$span(style="color: black;", "Number of Bins:"),
            min = 1,
            max = 50,
            value = 30),

div("The height of each bin shows how many values from that data fall into that range.", style="color: black;")

```

4. Add image into sidebar and caption text (using h instead of body/p text)

```

div(h6("Depicted below is a .gif of the Old Faithful geyser."), style="color: black"),

br(),

img(src = "oldfaithful.gif", height = 350, width = 200)

```

5. Edit colours of histogram

```

hist(x, breaks = bins, col = "navy", border = "cyan",
     xlab = "Waiting time to next eruption (in mins)",
     main = "Histogram of waiting times")

```
